

BEIRA AGRICULTURAL GROWTH CORRIDOR (BAGC)

Call for Proposals

The Beira Agricultural Growth Corridor (BAGC) is an initiative of the Government of Mozambique, the private sector and donor agencies to promote increased investments in commercial agriculture and agribusiness within the Beira Corridor. To reduce the risk for private businesses to build commercial supply chains involving smallholders, the BAGC has created a Smallholder Support Facility (SSF) which provides matching grants to eligible organizations for the implementation of innovative models for delivery of agricultural services to market focused smallholder farmers. The SSF is a mechanism by which private investment in BAGC is leveraged to improve the productivity and incomes of smallholders. The SSF will finance a wide range of initiatives involving technology development and transfer, farmer organization and training as well as private sector driven smallholder outgrower schemes. Priority will be given to financing initiatives that can show some impact on beneficiaries within a period of two years. The BAGC is inviting applications from eligible organisations to prepare and submit proposals to access this facility.

Details on eligibility criteria and guidelines for submitting proposals can be obtained on request from the BAGC Partnership offices in Chimoio and Beira or through any the following contacts: liria.sambo2011@gmail.com; admin@beiracorridor.com.
